Web Development Intern, Greensboro, NC

**Project Description:** The web development intern will work under the direction of our Marketing and Business Development Services manager, and gain valuable experience by applying his/her talents to building a real-world dynamic web application to help our project management teams in the field. Other duties may include building static and dynamic web pages and front end development.

By developing an innovative application, the intern will build an excellent resume while gaining valuable exposure to how computer science, data management, web applications, corporate communications, UX design, graphics, and marketing materials integrate in a business environment.

**Essential Traits and Skills:**

- Positive, can-do attitude
- Organized and detail oriented
- Excited about problem solving
- Computer Science Bachelors or Masters Candidate
- Proficient in HTML, CSS, PHP, MySQL, JQuery, JavaScript
